The screenshot displays the Cisco Packet Tracer software interface. The main workspace shows a network topology with a central switch (Switch2) connected to two PCs (PC6 and PC7). The interface includes a menu bar at the top, a toolbar with various icons, and a status bar at the bottom. The right-hand side features a Simulation Panel with an Event List table, Play Controls, and a list of visible events. The bottom status bar shows the current time (00:08:11.469) and various simulation controls.
